#### **DETAILED ACTION**

# Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 2. Claims 5-10 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for moving a cutting blade greater than 0 mm/minute, does not reasonably provide enablement for moving the blade at a speed less than 0 mm/minute. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. Speed is an absolute value.
- The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 5-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5, line 4: the expression  $\beta \le -253a + 65$  renders the claim vague and indefinite. It is unclear how a blade can travel in negative speed and have a thickness to meet the expression. The speed takes into account only the distance traveled; it does not take into account the direction of travel. Speed is always a positive number (absolute value). If it is a negative number, the blade will travel back in time. This expression violates every known physical law.

Further, it is inconceivable that a blade having a thickness of less than 65/253 (0.257) mm to cut an optical cable.

NOTE: No art rejections have been applied to the claims 5-10 since there are a great deal of confusion and uncertainty as to the proper interpretation of the limitations of claims.

Therefore, it would not be proper to reject such claims on the basis of prior art. See MPEP 2173.06.

### Response to Arguments

5. Applicant's arguments with respect to claims 5-10 have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

- 6. Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.
- 7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Application/Control Number: 09/160,581 Page 4

Art Unit: 3729

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick K. Chang whose telephone number is (703) 308-4784. The examiner can normally be reached on 5:30 AM to 1:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter D. Vo can be reached on (703) 308-1789. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9302 for regular communications and (703) 872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1148.

Rick K. Chang
